

## All About Strawberries

### Materials

- Knowledge Center Strawberry Parts and Facts PowerPoint
- Strawberry Part Labels
- Strawberry Parts worksheet
- Tape
- Scissors
- Strawberries
- Toothpicks
- Butter knife
- Strawberry Crossword puzzle
- Chocolate (optional)

### Procedure

1. Begin passing out Strawberry Parts worksheets to each students.
2. Go through the Knowledge enter Strawberry parts and Facts PowerPoint
3. Instruct students to write down the strawberry facts on the back of their worksheet along with the nutrition facts.
4. They should then write the definition for each strawberry part.
5. Then each student should receive a strawberry parts label set to cut out. They should only cut the dotted lines.
6. Then each students should receive a strawberry, six tooth picks, a butter knife, and tape. They should then label the parts of a strawberry.
  - If you are doing this as a Valentine’s Day activity consider making chocolate covered strawberries. As a warm up exercise ask students to brainstorm what agricultural products are sold as gifts on Valentine’s Day and what agricultural careers contribute to Valentine’s Day.
7. Once students label their strawberry they can fill out the Strawberry crossword puzzle.
