i Drought and other crisis situations can induce stress. It is important to remember the warning signs of stress and be willing to have a conversation about it.

WARNING SIGNS OF STRESS

Physical

Headaches
Ulcers
Frequent Sickness
Backaches
Sleep Disturbances

Emotional

Sadness
Anger
Anxiety
Bitterness
Loss of Humor

Behavioral

Irritability
Withdrawal
Alcoholism
Acting Out
Backbiting

Cognitive

Memory Loss
Lack of Concentration
Inability to Make Decisions
Decreased Self-Esteem

HOW TO START CONVERSATIONS

It can be difficult to start conversations on the topic of stress. Here are some tips to get you started:

- Acknowledge their feelings. "What you're going through must be difficult, how are you managing?"
- Show interest. "You mentioned that meeting was really stressful, can you tell me more about it?"
- Don't be afraid to ask. "You seem to be thinking about a lot, is there anything I can do to help you?"
- Stay present and connected. "You mentioned maybe seeking help, I can help connect you to a resource."

DROUGHT RESPONSE STRATEGIES

Drought Management Strategies to Consider

- Pasture Management
- Forage Saving / Destocking Options
- Alternative Feeds
- Water Quality and Heat Stress
- Financial Options

Things to ask yourself when working through strategies

- Does it move towards my vision or goals?
- Is it feasible?
- Will it make an impact?
- Do the benefits outweigh the cost?
